Dhaka, Bangladesh

PROFESSIONAL SUMMARY

Innovative AI Engineer and Full-Stack Developer with over 5 years of experience designing scalable agentic systems, RAG pipelines, and MLOps architectures. Expert in Python, Generative AI (LLMs), and cloud deployment (AWS). Proven track record in bridging the gap between research and production engineering, delivering automated solutions for healthcare and e-commerce sectors. Highly skilled in CI/CD implementation, backend API development, and data engineering, seeking to leverage technical expertise in a challenging AI Engineering or relevant role.

TECHNICAL SKILLS

- **Generative AI:** LLM Development & Fine-tuning (LORA/PEFT, Quantization), Advanced RAG (ChromaDB, Milvus, Pinecone), AI Agents (LangChain, MCP, A2A, CrewAI, LangGraph), Prompt Engineering, Multimodal AI.
- **Languages & Frameworks:** Python, FastAPI, Django, SQL, TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, Selenium (Automation).
- **MLOps & Cloud:** CI/CD (GitHub Actions), Docker, Kubernetes, AWS (EC2, S3, SageMaker, Lambda), MLflow, DVC, Monitoring & Logging.
- **Databases & Data:** PostgreSQL, MongoDB, Redis, Vector Databases, ETL Pipelines, Web Scraping (Beautiful Soup), Knowledge Graphs.
- **Core Competencies:** Agile Methodologies, Statistical Analysis, System Architecture, Stakeholder Management, Technical Leadership.

PROFESSIONAL EXPERIENCE

- **Ajentica AI** Dhaka, Bangladesh
Full-Stack AI Engineer Nov 2025 – Present
 - Architecting multi-agent **agentic systems** for healthcare analytics using LangGraph and Open AI Agent SDK, enhancing data processing efficiency.
 - Developing robust backend services and RESTful APIs using **FastAPI** to orchestrate agent workflows and secure data access.
 - Implementing production-grade **RAG pipelines** integrating LLMs with vector databases and layered security for explainable medical record analytics.
 - Collaborating with cross-functional product and data teams to translate complex clinical requirements into reliable, scalable software solutions.
 - Ensuring strict compliance with data privacy standards and ethical AI practices in handling sensitive patient data.
- **Short Circuit Science** Dhaka, Bangladesh
AI Engineer Jan 2025 – Oct 2025
 - Developed an autonomous Agentic system for e-commerce call centre automation, significantly reducing manual data retrieval times.
 - Designed and built multi-agent LLM systems (Co-Pilot) for drug discovery using LangGraph/CrewAI and ChromaDB.
 - Managed the full software lifecycle including deploying applications via **Docker/Kubernetes** and maintaining **CI/CD pipelines** on AWS.
 - Engineered scalable backend APIs (FastAPI, Flask, Django) and managed PostgreSQL/MongoDB databases for high-availability systems.
 - Collaborated with international teams to integrate AI insights into core business logic.
- **Delineate (YC W25)** Remote
AI Engineer (Contractual) July 2023 – Dec 2024
 - Developed AI agents to distill millions of scientific papers into actionable insights, accelerating drug development timelines.
 - Fine-tuned LLMs (Gemma) using QLoRA on research-specific datasets to improve domain-specific query accuracy.
 - Automated literature mining and curated MBMA datasets from 400+ clinical trials for benchmarking.
 - Designed on-premises search engines for pharmacokinetics data retrieval, ensuring data security and rapid access.
- **Opus Technology Ltd** Dhaka, Bangladesh
AI Engineer Jan 2021 – June 2023
 - Streamlined MLOps and software delivery by implementing CI/CD pipelines, boosting deployment efficiency by **20%** on AWS.
 - Developed an esports prediction model achieving **10%** higher accuracy than betting odds through rigorous statistical analysis.
 - Led and mentored a team of 4 junior professionals, fostering a culture of continuous learning and code quality.
 - Managed client communications and requirement gathering for key business projects.

COMMUNITY & PROJECTS

- **Data Discovery (YouTube):** Creator of a technical channel producing tutorials on Generative AI, RAG architectures, and Research Reviews. (Channel Link)
- **Research (Ongoing):** Transfer Learning for Bone Marrow Classification & Thermal Comfort Analysis using XAI.

TEACHING EXPERIENCE

• Horizon Solutions <i>Instructor: Generative AI (Basic to Advanced)</i> Delivered comprehensive curriculum on LLMs, Transformers, Vector DBs, and Agent Architectures.	Dhaka, Bangladesh <i>July 2024</i>
• Skill Hunt <i>Instructor: Fundamentals of AI</i> Taught foundational AI and Machine Learning concepts to early-career developers.	Dhaka, Bangladesh <i>Aug 2021</i>

EDUCATION

• East West University <i>BSc. in Information and Communication Engineering (GPA: 3.46 / 4.0)</i>	Dhaka, Bangladesh <i>Graduated 2020</i>
• Matibhanga Degree College <i>Higher Secondary Certificate (Result: 4.64 / 5.0)</i>	<i>Graduated 2015</i>
